

NSSA-220 Project 2 – Grading Sheet

Requirement	Point Value	Points Earned
Packet filtering code successfully creates a filtered output file with only ICMP Echo Request and Echo Reply packets in it	25	
Packet parser successfully parses ICMP Echo Request and Echo Reply packets and stores them in memory for further processing	25	
Data size metrics 1-4 computed correctly	5	
Data size metrics 5-8 computed correctly	5	
RTT computed correctly	10	
Echo Request throughput/goodput computed correctly	20	
Average reply delay computed correctly	5	
Average number of hops per Echo Request computed correctly	5	
<b>Bonus: packet parser parses hexadecimal packet data</b>	5	
<b>Bonus: demonstrated use of Github for version control</b>	5	
Code does not follow specified general structure	-10	
Output files do not follow specified format/are not submitted	-10	
Project not submitted in a single zip file	-10	
<b>Project Grade:</b>
